

Learning the Art of Effective Communication

The State of Revitalization's Passionate Commitment

Through the 4-day Journalism School, they aspire to convey the journey of revitalization from the Great East Japan Earthquake and the nuclear accident at TEPCO's Fukushima Daiichi Nuclear Power Station. In the Soso District, students experienced firsthand the current situation and the passionate efforts of those engaged in revitalization. Special lecturer Mr. Akira Ikegami shared the essence of journalism, where emotions and storytelling intertwine. The students learned about the mindset of a reporter and techniques for effective communication in newspapers.

At Fuji Computer AI Technology Research Institute, students are learning about the workings of caregiving support robots.

Visiting Biomass Resin Fukushima to understand the process of creating "Rice Resin" until its completion

Interviewing staff from Asubito Fukushima (left) to learn about the company's founding purpose and initiatives.

Student journalists are receiving advice on newspaper layout and more from Mr. Yoshiaki Takeuchi (center), a lecturer from Soma High School.

Assembling the content of the articles based on interview notes, and writing while consulting with reporters and alumni.

78 years ago, on the morning of August 6th, the atomic bomb was dropped on Hiroshima. They all observed a moment of silence to remember the victims and prayed for peace.

Mr. Akira Ikegami and the audience were present as the students showcased their newspaper, presenting the results of what they had learned during the interviews.
